

Scarborough Caving Club

UPDATE FOR FEBRUARY 1995

A quickie this time!

Firstly, the Auction was poorly supported with only 7 members present, including our new member, Dave Jackson, who is an experienced caver, and who will be doing most trips this year.

The auction raised a few pounds for the club, but mainly for Mick, as he had several Descent binders (full) for sale, as well as several cave related books. Lyn also sold some caving gear.

Some ropes have been found to be marked incorrectly, or have had some length removed for whatever reason (damage etc) and have not been remarked. This just highlights the need for gear to be returned to the tacklemaster for regular checks, so please, if you have any club gear, bring it back!

The club has been given a Scaling pole approx. 30ft long in 5ft sections, by Pat Preistley, I am sure it will come in useful at some stage.

We still need a list of Registration numbers for some members, this is for obvious safety reasons, (overdue parties, accidents etc).

A Nomination slip is enclosed for you to Nominate your new committee for 1995, and as you will see Lyn is not standing for re election this year, so it is important to consider her replacement, but we do need these back QUICKLY so voting slips can go out before the AGM, on March 4th.

Some dates for your diary; Attached is a list of all current permit, non permit and meeting dates, also two events of great interest;

A lecture at Hull University called "From the Arctic to The Equator by Tube" by Dick Willis, these lectures are excellent, and they are FREE.

The other is a BCRA Hydrology Weekend based at the Punchbowl Inn, again super value at only £3.00, but book early; there are only 50 places and its open to the whole country!

Details are enclosed on both of these.

DONT FORGET TO USE YOUR NOMINATION SLIPS

see you at the AGM

REPORT FOR FEBRUARY 1957

A general idea of the
nature of the problem was
discussed in the meeting
held on the 15th of
February. It was pointed
out that the problem
is not a simple one
and that it will be
necessary to spend
some time in the
laboratory before a
definite plan can be
formulated. It was
agreed that the first
step should be to
obtain a list of
the various types of
problems which are
encountered in the
laboratory. This list
should be prepared
by the 1st of
March. It is hoped
that this will be
of some help.

A summary of the
work done during the
month of February
is given in the
report. It is hoped
that this will be
of some help. The
work done during
the month of
February was
concerned with
the study of the
properties of
the various types
of problems which
are encountered
in the laboratory.
It was found that
the properties of
these problems are
very similar to
those of the
problems which
are encountered
in the laboratory.
This is a very
interesting result
and it is hoped
that it will be
of some help.

Details are enclosed on both of these.
Best regards to all.
Yours truly,
Richard
